

## 文献情報

### FIA Bibliography ( III )

Yoshinobu Baba and Norimasa Yoza\*

Kyushu University

FIA-related papers appeared since 1984 have been compiled in this FIA Bibliography section. One hundred and seven papers were listed in the Journal of Flow Injection Analysis, 1(1), 32(1984); 1(2), 49(1984). All papers in this section are numbered in series and shown with the titles in English. The readers are requested to send us\* the reprints of their FIA-related papers that have not yet been listed in this section.

\*Department of Chemistry, Faculty of Science, Kyushu University,  
Fukuoka 812, JAPAN

108. High speed, on-stream acid-base titration utilizing flow injection analysis  
K.G. Schick, *Adv. Instrum.*, 39, 279(1984)
109. An automated ion analyzer  
C.B. Ranger, *Am. Lab.*, 17, 92(1985)
110. Laboratory automation and information management for continuous flow analysis  
M.J. Milano and W.G. Liesegang, *Am. Lab.*, 17, 132(1985)
111. New approach to the simultaneous determination of pollutants in waste waters by flow injection analysis  
Part 1. Anionic pollutants  
A. Rios, M. D. Luque de Castro and M. Valcarcel, *Analyst (London)*, 109, 1487(1984)
112. Studies on flow injection analysis with sulphide ion-selective electrodes  
M.G. Glaister, G.J. Moody and J.D.R. Thomas, *Analyst (London)*, 110, 113(1985)

113. Determination of silicon in soil extracts by flow injection analysis  
O.K. Borggaard and S.S. Jorgensen, *Analyst* (London), 110, 177(1985)
114. Sequential spectrophotometric determination of chromium(III) and chromium(VI) using flow injection analysis  
J. Carlos de Andrade, J.C. Rocha and N. Baccan, *Analyst* (London), 110, 197(1985)
115. New approach to the simultaneous determination of pollutants in waste waters by flow injection analysis  
Part II. Cationic pollutants  
A. Rios, M.D. Luque de Castro and M. Valcarcel, *Analyst* (London), 110, 277(1985)
116. Rapid sequential determination of chromium(III)-chromium(VI) by flow injection analysis-inductively coupled plasma atomic-emission spectrometry  
A.G. Cox, I.G. Cook and C.W. McLeod, *Analyst* (London), 110, 331(1985)
117. Flow injection amperometric determination of ascorbic acid and dopamine at a sessile mercury drop electrode without deoxygenation  
A.G. Fogg, A.M. Summan and M.A. Fernandez-Arciniega, *Analyst* (London), 110, 341(1985)
118. Flow injection amperometric determination of nitroprusside at a glassy carbon electrode and at a sessile mercury drop electrode  
A.G. Fogg, M.A. Fernandez-Arciniega and R.M. Alonso, *Analyst* (London), 110, 345(1985)
119. Spectrophotometric determination of lithium ion with the chromogenic crown ether, 2",4"-dinitro-6"-trifluoro methylphenyl-4'-aminobenzo-14-crown-4  
Y.P. Wu and G.E. Pacey, *Anal. Chim. Acta*, 162, 285(1984)
120. Immobilized enzyme kinetics analyzed by flow-through microfluorimetry  
Resorufin- $\beta$ -D-galactopyranoside as a new fluorogenic substrate for  $\beta$ -galactosidase

- J. Hofmann and M. Sernetz, *Anal. Chim. Acta*, 163, 67 (1984)
121. Rapid determination of cephalosporins with an immobilized enzyme reactor and sequential subtractive spectrophotometric detection in an automated flow-injection system  
G. Decristoforo and F. Knauseder, *Anal. Chim. Acta*, 163, 73(1984)
122. Determination of urea with an ammonia gas-sensitive semiconductor device in combination with urease  
F. Winqvist, A. Spetz, I. Lundstrom and B. Danielsson, *Anal. Chim. Acta*, 163, 143(1984)
123. Rapid determination of sulfide in waste waters by continuous flow analysis and gas diffusion and a potentiometric detector  
K. Brunt, *Anal. Chim. Acta*, 163, 293(1984)
124. Determination of the substrates of dehydrogenases in biological material in flow-injection systems with electrocatalytic NADH oxidation  
A. Schelter-Graf, H.-L. Schmidt and H. Huck, *Anal. Chim. Acta*, 163, 299(1984)
125. An efficient flow-injection system with on-line ion-exchange preconcentration for the determination of trace amounts of heavy metals by atomic absorption spectrometry  
Z. Fang, J. Ruzicka and E.H. Hansen, *Anal. Chim. Acta*, 164, 23(1984)
126. The determination of trace amounts of heavy metals in waters by a flow-injection system including ion-exchange preconcentration and flame atomic absorption spectrometric detection  
Z. Fang, S. Xu and S. Zhang, *Anal. Chim. Acta*, 164, 41(1984)
127. Real-time thermal lens absorption measurements with application to flow-injection systems  
R.A. Leach and J.M. Harris, *Anal. Chim. Acta*, 164, 91(1984)
128. A comparison of spectrophotometric and chemiluminescence methods for the determination of blood glucose by flow injection analysis  
R.J. Worsfold, J. Farrelly and M.S. Matharu, *Anal. Chim. Acta*, 164, 103(1984)
129. Determination of ammonia in air and aqueous samples with a gas-

- sensitive semiconductor capacitor  
F. Winquist, A. Spetz, I. Lundstrom and B. Danielsson, *Anal. Chim. Acta*, 164, 127(1984)
130. Flow-through tubular PVC matrix membrane electrode without inner reference solution for flow injection analysis  
S. Alegret, J. Alonso, J. Bartroli, J.M. Paulis, J.L.F.C. Lima and A.A.S.C. Machado, *Anal. Chim. Acta*, 164, 147(1984)
131. Extraction based on the flow-injection principle  
Part 6. Film formation and dispersion in liquid-liquid segmented flow extraction systems  
L. Nord and B. Karlberg, *Anal. Chim. Acta*, 164, 233(1984)
132. Stopped-flow injection determination of copper(II) at the  $\text{ng ml}^{-1}$  level  
F. Lazaro, M.D. Luque de Castro and M. Valcarcel, *Anal. Chim. Acta*, 165, 177(1984)
133. A flow-injection manifold based on splitting the sample zone and a confluence point before a single detector unit  
A. Fernandez, M.A. Gomez-Nieto, M.D. Luque de Castro and M. Valcarcel, *Anal. Chim. Acta*, 165, 217(1984)
134. A random walk simulation of flow injection analysis  
D. Betteridge, C.Z. Marczewski and A.P. Wade, *Anal. Chim. Acta*, 165, 227(1984)
135. Flow injection analysis for glucose by the combined use of an immobilized glucose oxidase reactor and a peroxidase electrode  
T. Yao, M. Sato, Y. Kobayashi and T. Wasa, *Anal. Chim. Acta*, 165, 291(1984)
136. Determination of glucose in blood by flow injection analysis and an immobilized glucose oxidase column  
M. Masoom and A. Townshend, *Anal. Chim. Acta*, 166, 111(1984)
137. Differential pulse voltammetry with fast pulse repetition times in a flow-injection system with a copper-amalgam electrode  
P.W. Alexander and U. Akapongkul, *Anal. Chim. Acta*, 166, 119(1984)
138. Spectroelectrochemical detector for flow-injection systems and liquid chromatography

- H.D. Dewald and J. Wang, *Anal. Chim. Acta*, 166, 163(1984)
139. Spectrophotometric determination of copper as a dithiocarbamate by flow injection analysis  
R.M. Smith and T.G. Hurdley, *Anal. Chim. Acta*, 166, 271(1984)
140. Determination of penicillin V in fermentation samples by flow injection analysis  
I. Schneider, *Anal. Chim. Acta*, 166, 293(1984)
141. Galactose determination in an automated flow-injection system containing enzyme reactors and an on-line dialyzer  
B. Olsson, H. Lundback and G. Johansson, *Anal. Chim. Acta*, 167, 123(1985)
142. Flow-rate dependence of post-column reaction chromatographic detectors and optimization of reactor length for slow chemical reactions  
Y.T. Shih and P.W. Carr, *Anal. Chim. Acta*, 167, 137(1985)
143. Application of a reducing column for metal speciation by flow injection analysis  
Spectrophotometric determination of iron(III) and simultaneous determination of iron(II) and total iron  
A. T. Faizullah and A. Townshend, *Anal. Chim. Acta*, 167, 225(1985)
144. Enzymatic immunoassay of  $\alpha$ -fetoprotein, insulin and 17- $\alpha$ -hydroxyprogesterone based on chemiluminescence in a flow-injection system  
M. Maeda and A. Tsuji, *Anal. Chim. Acta*, 167, 241(1985)
145. Flow injection determination of hydrogen peroxide by means of a solid-state peroxyoxalate chemiluminescence reactor  
P. Van Zoonen, D.A. Kamminga, C. Gooijer, N.H. Velthorst and R.W. Frei, *Anal. Chim. Acta*, 167, 249(1985)
146. Determination of arsenic at the picogram level by atomic absorption spectrometry with miniaturized suction-flow hydride generation  
M. Ikeda, *Anal. Chim. Acta*, 167, 289(1985)
147. Extraction-spectrophotometric determination of anionic surfactants with a flow-injection system  
Y. Hirai and K. Tomokuni, *Anal. Chim. Acta*, 167, 409(1985)

148. Design and evaluation of a new phase separator for liquid-liquid extraction in flow systems  
K. Backstrom, L.-G. Danielsson and L. Nord, *Anal. Chim. Acta*, 169, 43(1985)
149. A simple multifunctional valve for flow injection analysis  
S.S. Jorgensen, K.M. Petersen and L.A. Hansen, *Anal. Chim. Acta*, 169, 51(1985)
150. The application of strongly oxidizing agents in flow injection analysis  
Part 1. Silver(II)  
R.C. Schothorst and G.D. Boef, *Anal. Chim. Acta*, 169, 99(1985)
151. Spectrophotometric determination of uranium(VI) with 2-(5-bromo-2-pyridylazo)-5-diethylaminophenol in a flow-injection system  
E.A. Jones, *Anal. Chim. Acta*, 169, 109(1985)
152. Sequential and differential catalytic-fluorimetric determination of manganese and iron by flow injection analysis  
F. Lazaro, M.D. Luque de Castro and M. Valcarcel, *Anal. Chim. Acta*, 169, 141(1985)
153. Indirect atomic absorption spectrometric determination of perchlorate by liquid-liquid extraction in a flow-injection system  
M. Gallego and M. Valcarcel, *Anal. Chim. Acta*, 169, 161 (1985)
154. Evaluation of critical parameters for measurement of pH by flow injection analysis  
Determination of pH in soil extracts  
C. Hongbo, E.H. Hansen and J. Ruzicka, *Anal. Chim. Acta*, 169, 209(1985)
155. Enzymatic determination of glucose in a flow system by catalytic oxidation of the nicotinamide coenzyme at a modified electrode  
R. Appelqvist, G. Marko-Varga, L. Gorton, A. Torstensson and G. Johansson, *Anal. Chim. Acta*, 169, 237(1985)
156. Simultaneous determination of free and EDTA-complexed copper ions by flame atomic absorption spectrometry with an ion-exchange flow-injection system

- E.B. Milosavljevic, J. Ruzicka and E.H. Hansen, *Anal. Chim. Acta*, 169, 321(1985)
157. Chemically coupled spectrophotometric assays based on flow injection analysis: determination of nitrogenase by assays for creatine, ammonia, hydrazine, phosphate and dithionite  
L.C. Daris and G.A. Radke, *Anal. Biochem.*, 140, 434(1984)
158. Flow injection analysis of catecholamine secretion from bovine adrenal medulla cells on microbeads  
M. Herrera, L.-S. Kao, D.J. Curran and E.W. Westhead, *Anal. Biochem.*, 144, 218(1985)
159. Thermal lens absorption measurements by flow injection into supercritical fluid solvnets  
R.A. Leach and J.M. Harris, *Anal. Chem.*, 56, 2801(1984)
160. Flow injection and photometric determination of hydrogen peroxide in rainwater with N-ethyl-N-(sulfopropyl)aniline sodium salt  
B.C. Madsen and M.S. Kromis, *Anal. Chem.*, 56, 2849(1984)
161. Single-laser/crossed-beam thermal lens detection for short path length samples and flow injection analysis  
Y. Yang and R.E. Hairrell, *Anal. Chem.*, 56, 3002(1984)
162. Sensitivity Enhancements for flow injection analysis-inductively coupled plasma atomic emission spectrometry using an on-line preconcentrating ion-exchange column  
S.D. Hartenstein, J. Ruzicka and G.D. Christian, *Anal. Chem.*, 57, 21(1985)
163. Determination of proteins and denaturation studies by flow injection with a nickel oxide electrode  
C.J. Yuan and C.O. Huber, *Anal. Chem.*, 57, 180(1985)
164. Hydrodynamic and interfacial origin of phase segmentaion in solvent extraction/flow injection analysis  
F.F. Cantwell and J.A. Sweileh, *Anal. Chem.*, 57, 329(1985)
165. Sample introduction by solvent extraction/flow injection to eliminate interferences in atomic absorption spectroscopy  
J.A. Sweileh and F.F. Cantwell, *Anal. Chem.*, 57, 420(1985)
166. Flow-injection system for the rapid and sensitive assay of

- concentrated aqueous solutions of strong acids and bases  
J.A. Polta, I.-H. Yeo and D.C. Johnson, *Anal. Chem.*, 57, 563(1985)
167. Performance studies under flow conditions of silica-immobilized 8-quinolinol and its application as a preconcentration tool in flow injection/atomic absorption determinations  
M.A. Marshall and H.A. Mottola, *Anal. Chem.*, 57, 729(1985)
168. Automated iodometric method for determination of trace chlorate ion using flow injection analysis  
K.G. Miller, G.E. Pacey and G. Gordon, *Anal. Chem.*, 57, 734(1985)
169. Determination of acidity constants by solvent extraction/flow injection analysis using a dual-membrane phase separator  
L. Fossey and F.F. Cantwell, *Anal. Chem.*, 57, 922(1985)
170. Flow injection and liquid chromatography detector for amino acids based on a postcolumn reaction with luminol  
A. MacDonald and T.A. Nieman, *Anal. Chem.*, 57, 936(1985)
171. Potentiometric and amperometric detection in flow injection enzymatic determinations  
H.A. Mottola, C.M. Wolff, A. Job and R. Gnanasekaran, *Anal. Chem. Symp. Ser.*, 18, 49(1984)
172. Fluorimetric determination of pyridoxal and pyridoxal-5-phosphate by flow injection analysis  
P. Linares, M.D. Luque de Castro and M. Valcarcel, *Anal. Lett.*, 18, 67(1985)
173. Determination of lactate dehydrogenase isoenzyme( LD-1 ) using flow injection analysis with electrochemical detection after immunochemical separation  
T. Toyoda, S.S. Kuan and G.G. Guilbault, *Anal. Lett.*, 18, 345(1985)
174. Flow injection analysis: fundamentals and recent developments  
J.N. Miller, *Anal. Proc. (London)*, 21, 372(1984)
175. Optimization of conditions for flow injection analysis  
D. Betteridge, A.F. Taylor and A.P. Wade, *Anal. Proc. (London)*, 21, 373(1984)
176. Practical aspects of flow injection analysis  
A. Shaw, *Anal. Proc. (London)*, 21, 375(1984)

177. Clinical applications of flow injection analysis  
J.P. Worsfold, Anal. Proc. (London), 21, 376(1984)
178. Flow injection analysis combined with atomic-absorption spectrometry  
J. Tyson, Anal. Proc. (London), 21, 377(1984)
179. Applications of immobilized enzymes in flow injection analysis  
M. Masoom and A. Townshend, Anal. Proc. (London), 22, 6 (1985)
180. Flow injection analysis with chemiluminescence detection: determination of hydrazine  
A.T. Faizullah and A. Townshend, Anal. Proc. (London), 22, 15(1985)
181. Monitoring of immunoprecipitin reactions using flow injection analysis  
A. Hughes and P.J. Worsfold, Anal. Proc. (London), 22, 16 (1985)
182. Flow injection analysis of hydrogen peroxide using immobilized horseradish peroxidase and its fluorogenic substrate 3-(p-hydroxyphenyl)propionic acid  
Y. Hayashi, K. Zaitzu and Y. Ohkura, Anal. Sci., 1, 65(1985)
183. Use of immobilized enzymes in flow injection analysis  
M.H. Ho and M.U. Asouzu, Ann. N.Y. Acad. Sci., 434, 526 (1985)
184. Microprocessor-controlled flow injection analyzer for biochemical applications  
M.H. Ho, Biomed. Sci. Instrum., 20, 93(1984)
185. Flavin mononucleotide chemiluminescence for determination of traces of copper(II) by continuous flow and flow injection methods  
M. Yamada, H. Kanai and S. Suzuki, Bull. Chem. Soc. Jpn., 58, 1137(1985)
186. Flow injection analysis of  $\alpha$ -amino acids by the chemiluminescence method  
T. Hara, M. Toriyama, T. Ebuchi and M. Imaki, Chem. Lett., 1985, 341
187. Specific and selective determination method for halide anions by a flow injection technique  
M. Miyazaki, N. Okubo, K. Hayakawa and T. Umeda, Chem. Pharm. Bull., 32, 3702(1984)

188. Flow injection analysis ( in pharmaceutical analysis )  
J.B. Landis, *Drugs Pharm. Sci.*, 11( Pharm. Anal., Pt. B ), 217(1984)
189. Determination of nitrate in natural waters by flow-injection analysis  
S. Nakashima, M. Yagi, M. Zenki, A. Takahashi and K. Toei,  
*Fresenius Z. Anal. Chem.*, 319, 506(1984)
190. Simultaneous catalytic-fluorimetric determination of copper and mercury by flow-injection analysis  
F. Lazaro, M.D. Luque de Castro and M. Valcarcel, *Fresenius Z. Anal. Chem.*, 320, 128(1985)
191. Application of flow injection techniques for the analysis of inorganic anions  
J. Moller and B. Winter, *Fresenius Z. Anal. Chem.*, 320, 451(1985)
192. Double-detection technique for flow-injection analysis  
( in German )  
G. Schulze, O. Elsholz and W. Frenzel, *Fresenius Z. Anal. Chem.*, 320, 650(1985)
193. Flow injection analysis: potential for process composition measurement  
R.A. Mowery Jr., *InTech*, 31, 51(1984)
194. Highly sensitive flow injection analysis of glucose and uric acid in serum using an immobilized enzyme column and chemiluminescence  
M. Tabata, C. Fukunaga, M. Ohyabu and T. Murachi, *J. Appl. Biochem.*, 6, 251(1984)
195. The design of a computer-controlled flow-injection analyzer: an undergraduate experiment  
S.A. McClintock, J.R. Weber and W.C. Purdy, *J. Chem. Educ.*, 62, 65(1985)
196. Modifications of the wall-jet electrochemical detector for liquid chromatography and flow analysis  
Z. Niegreis, L. Szucs, J. Fekete, G. Horvai, K. Toth and E. Pungor, *J. Chromatogr.*, 316, 451(1984)
197. Simultaneous determination of phosphate and phosphonate by flow injection analysis and high-performance liquid chromatography

- with a series detection system  
 Y. Baba, N. Yoza and S. Ohashi, *J. Chromatogr.*, 318, 319(1985)
198. Characterization of enzymatic hydrolysis of inorganic polyphosphates by flow injection analysis and high-performance liquid chromatography  
 N. Yoza, H. Hirano, Y. Baba and S. Ohashi, *J. Chromatogr.*, 325, 385(1985)
199. Electrocatalysis at platinum electrodes for anodic electroanalysis  
 D.S. Austin, J.A. Polta, T.Z. Polta, A.P.C. Tang, T.D. Cabelka and D.C. Johanson, *J. Electroanal. Chem. Interfacial Electrochem.*, 168, 227(1984)
200. FIA ( flow injection analysis ) is also for lactate determination ( in German )  
 H. Weicker, *LaborPraxis*, 8, 300(1984)
201. Catalytic determination of traces of cobalt by the protocatechuic acid-hydrogen peroxide reaction in a flow injection system  
 T. Yamane, *Mikrochim. Acta*, 1984 I, 425
202. Photometric flow-injection measurements with flow-cell employing light emitting diodes  
 M. Trojanowicz, W. Aufustyniak and A. Hulanicki, *Mikrochim. Acta*, 1984 II, 17
203. Catalytic photometric method for the determination of molybdenum in plants with flow injection analysis  
 L.K. Lu and Y.M. Chen, *Proc. Natl. Sci. Council., Repub. China, Part A*, 8, 85(1984)
204. A software package for computer-controlled flow-injection analysis  
 L.T.M. Prop, P.C. Thijssen and L.G.G. van Dongen, *Talanta*, 32, 230(1985)
205. Prediction of the behaviour of a single flow-injection manifold  
 M.A. Gomez-Nieto, M.D. Luque de Castro, A. Martin and M. Valcarcel, *Talanta*, 32, 319(1985)
206. Comments on the paper by Gomez-Nieto, Luque de Castro, Martin and Valcarcel

- J.T. Vanderslice and G.R. Beecher, *Talanta*, 32, 334(1985)
207. Reply to the comments by Vanderslice and Beecher  
M. Valcarcel and M. D. Luque de Castro, *Talanta*, 32, 339(1985)
208. Phosphorescence in liquid solutions: a promising detection principle in liquid chromatography and flow injection analysis  
C. Gooijer, N.H. Velthorst and R.W. Frei, *Trends Anal. Chem.*, 3, 259(1984)
209. Flow-injection analysis for determining total alkalinity in surface, ground and domestic water using the automated bromocresol green method ( in Afrikaans )  
J.F. Van Standen and H.R. Van Vliet, *Water SA*, 10, 168(1984)
210. Flow injection determination of iron in soil extracts ( in Chinese )  
H. Cui and Z. Fang, *Fenxi Huaxue*, 12, 759(1984)
211. Determination of trace amounts of nickel by online flow injection ion-exchange preconcentration atomic absorption spectrometry ( in Chinese )  
Z. Fang, S. Xu and S. Zhang, *Fenxi Huaxue*, 12, 997(1984)
212. Determination of copper, zinc, iron, manganese, sodium, potassium, calcium and magnesium in plants and soil by flow-injection atomic absorption spectrometry ( in Chinese )  
S. Zhang, L. Sun, H. Jiang and Z. Fang, *Guangpuxue Yu Guangpu Fenxi*, 4, 42(1984)
213. Recent development in flow injection analysis ( in Chinese )  
X. Xu and Z. Fang, *Huaxue Tongbao*, 1984, 22
214. Flow injection catalytic photometric determination of trace iodine in rock and ore samples ( in Chinese )  
K. Li and P. Hua, *Yanshi Kuangwu Ji Ceshi*, 3, 314(1984)
215. Flow injection analysis of L-lactate with lactate dehydrogenase immobilized open tubular reactor ( in Japanese )  
F. Morishita, Y. Hara and T. Kojima, *Bunseki Kagaku*, 33, 642(1984)
216. Catalytic determination of trace amounts of manganese with a flow injection system ( in Japanese )  
T. Yamane and Y. Nozawa, *Bunseki Kagaku*, 33, 652(1984)

217. Automated system for total phosphorus in waste waters by flow injection analysis ( in Japanese )  
T. Korenaga and K. Okada, *Bunseki Kagaku*, 33, 683(1984)
218. Determination of silicate by flow injection analysis coupled with suppression column and solvent extraction system  
K. Ogata, S. Soma, I. Koshiishi, S. Tanabe and T. Imanari, *Bunseki Kagaku*, 33, E535(1984)
219. Flow injection analysis of fluoride ions using catalytic reactions ( in Japanese )  
K. Toda, I. Sanemasa and T. Deguchi, *Bunseki Kagaku*, 34, 31(1985)
220. Determination of cyanide ion as its fluorescent derivative by flow injection analysis ( in Japanese )  
Y. Suzuki and T. Inoue, *Bunseki Kagaku*, 34, 53(1985)
221. Trace analysis of heavy metal in water by flow injection analysis using catalytic reactions ( in Japanese )  
C. Maekoya, F. Shiratsuchi and K. Yano, *Hitachi Scientific Instrument News*, 28(1), 13(1985)
222. Flow injection analysis of silicic acid in geothermal water ( in Japanese )  
T. Yokoyama and T. Tarutani, *J. Jpn. Geothermal Energy Assoc.*, 22, 9(1985)
223. Dynamics of the anionic surfactants in river and creek waters of Saga city ( in Japanese )  
Y. Hirai, N. Koga, T. Hasegawa and K. Tomokuni, *Jpn. J. Hyg.*, 39, 787(1984)
224. A new analysis for sulfur compounds ( in Japanese )  
T. Odashima and K. Satoh, *Mizu Shori Gijutsu*, 25, 647(1984)
225. Flow injection analysis for uric acid by the combined use of an immobilized uricase reactor and a peroxidase electrode ( in Japanese )  
T. Yao, M. Sato and T. Wasa, *Nippon Kagaku Kaishi*, 1985, 189
