1992 Winter Conference on Flow Injection Analysis

WCFIA 92 will be held in Scottsdale, Arizona, January 12-15, 1992. It will focus on how industrial FIA techniques have helped solve real world problems. New hardware and software-driven applications will be presented. The following areas will be highlighted: process chemistry, biotechnology, instrument design, new methods, atomic spectroscopy, electrochemistry. There will be a vendor exhibition. Deadline for abstracts for presentation (20 min.) and posters, and for preregistration, is December 3, 1991.

WINTER CONFERENCE ON FLOW INJECTION ANALYSIS

(WCFIA 92)

Scottsdale, Arizona

January 12-15, 1992

FIA techniques are being used in many laboratories throughout the world. Although the idea of injecting a sample has been around for many years, the concept of controllable dispersion is only starting to be more clearly understood. As a result, FIA is being viewed as an alternative that can simplify analyses which previously were time consuming or presented difficulties in data acquisition.

Much of the progress that FIA has made over the years is the result of better hardware designs and the practical implementation of chemistry. This conference strives to bring these two important aspects of science together.

WCFIA 92 will focus on how industrial FIA techniques have helped solve real world problems. New hardware and software-driven applications will be presented.

The conference will consist of two and a half days highlighting the following areas:

Process Chemistry
Biotechnology
Instrument Design
New Methods
Atomic Spectroscopy
Electrochemistry

In addition to the technical sessions, the conference offers a unique opportunity for the informal exchange of information and ideas among the chemists and engineers working in the FIA field.

Call for Papers

If you are interested in presenting a paper or poster, or exhibiting hardware at WCFIA 92, return the Presentation Reply Form by November 15, 1991. Accepted papers will be 20 minutes in length. We suggest using 35 mm slides for the presentation. Posters should fit on 4' x 6' presentation boards. If you would like to display products at the conference, let us know your space and power requirements and any other needs you may have.

Sunday Excursion

Since many airfares are lower for Saturday arrivals, WCFIA 92 is planning an optional group outing for participants and/or families on Sunday, January 12, 1992. The Scottsdale area is rich in Old West culture and activities. Additional details will be sent with your registration confirmation.

Vendor Participation

The following vendors will attend the conference: Lachat Instrument Company; Perkin-Elmer Corporation; Eppendorf Inc.; Perstorp Analytical; Alitea USA; and Novatek. As discussed at WCFIA 91, we are encouraging specific component vendors for intelligent samplers, pumps, and valves to attend.

To register, complete and return the Pre-Registration Form on the back of this flyer. Registration may be done by FAX (206)685-3478 or by phone (206)543-1635. A confirmation package will be sent to you by December 15, 1991. Registration cancellations will be assessed a \$50 administration fee.
